

Environmental Review Report

FORM 8-01-2

Date:

Project Name:

Proponent:

Supporting Document(s):

The First Nation's environmental assessment process is triggered in appropriate cases where the First Nation is approving, regulating or funding or undertaking a project on First Nation land. The assessment will occur as early as possible in the planning stages of the project before an irrevocable decision is made.

The Environmental Review Process applies to the following:

- A) any grant or disposition of an interest or licence in First Nation Land; and
- B) any Project on First Nation Land.

Environmental Review Report –

A.) Lands Department recommendation on whether the environmental effects of the project are adverse.

B.) Information to Assist Council in determining whether environmental effects are adverse, including information on the **quality of the existing environment compared to the predicted quality of the environment once the project is complete.**

C.) The Lands Department recommendation on whether the environmental effects of the project are significant.

D.) Information to assist Council in determining whether environmental effects are significant, including:

- i) magnitude/severity of the adverse environmental effects and information on whether they are minor or catastrophic
- ii) the extent the project may contribute to cumulative environmental effects
- iii) the geographic extent of the adverse environmental effects, including whether they are localized to a small geographic area or widespread
- iv) the duration and frequency of the adverse environmental effects, such as whether they are long-term or frequent
- v) any known adverse environmental effects are reversible or irreversible; and
- vi) the degree to which the environment has already been adversely affected by human activities, or the fragility of the environment as a result of human activities;

E.) the Lands Department recommendation on whether the environmental effects of the project are likely;

F) Information to assist Council in determining whether the environmental effects are likely, which involves information on the probability of such effects occurring; and

G.) the Lands Department recommendation on whether the environmental effects of the project can be adequately mitigated;

H.) information to assist Council in determining whether the environmental effects of the project can be mitigated, including any mitigation measures that are included in the proposed project and any mitigation measures that the Lands Department recommends for the proposed project. For each adverse effect that is identified, there should be a mitigation measure.

Mitigation Measures

The developer will remove and properly dispose of waste materials generated during construction and operation activities. The developer will ensure fill materials are free of contaminants. All activities will be suspended at once if there are suspected archeological finds unearthed (per Tipi Mountain Eco-Cultural Services Assessment Report).

The Proponent will abide by all relevant Provincial, and Federal legislation and regulations.
